EXPERIENCE

- **0chain** [✉](#) Cupertino, CA (Remote)
Feb 2022 – Present
 - Software Development Engineer
 - Tech Stack: Kotlin, Java, Golang, AndroidSDK, GitHub Actions, Gin, Grafana.
 - Developed two Android apps, Bolt and Vult, increasing the Android user base by 20% for decentralized storage using ZCN cryptocurrency.
 - Spearheaded UAT test suite for enterprise storage eliminating production bugs by 90% and improving release quality.
 - Led and mentored two junior developers, improving code quality by 40% and ensuring 95% on-time delivery through effective scrum leadership.
 - Migrated and refactored GoSdk to decrease app size by 50%, also helped cross platform teams with the migration.
 - Integrated Elastic Search for processing and indexing transactions from blockchain which decreased the fetch time by 10x.
 - Built the release pipelines for android apps reducing manual labor and increasing release time by 70%.
- **Google Summer of Code Oppia Foundation** [link](#) [✉](#) Remote
Jun 2021 – Sept 2022
 - Open Source Contributor - Gsoc Student
 - Tech Stack: Kotlin, GitHub Actions, JUnit, UIAutomator, Gradle, Bazel, AndroidSDK.
 - Pioneered CI/CD pipeline enhancements, reducing build and deployment time by 40%, leading to faster release cycles.
 - Spearheaded Gradle to Bazel transition, increasing build efficiency by 60%, accelerating development cycles.
 - Expanded the application's reach by integrating tablet support, resulting in a 25% increase in the potential user base.
 - Orchestrated and refined over 90 automated tests, increasing codebase stability by 30% and reduced production bugs by 20%.
- **Gnome Foundation** [✉](#) Remote
Sept 2021 – Feb 2022
 - Open Source Contributor
 - Tech Stack: C, XML, GTK+.
 - Added a new feature in the path-bar of Nautilus file manager, improving user efficiency by 20% by enabling seamless opening of folders and files.
 - Designed and implemented a new button using XML, enhancing user interaction by 15% through improved interface functionality.

PROJECTS

- **Parking Lot Management System** [✉](#): Developed a RESTful API using Node.js, Express.js, and MongoDB to manage parking spaces. Integrated Winston for logging and conducted unit and integration testing with Jest.
- **Airline ticketing system** [✉](#): Built using Spring Boot in MVC architecture where a user can book tickets, query flights and cancel tickets also Dockerized.
- **Trip Feedback System** [✉](#): Designed a feedback system for Travelers and Transport Managers with secure feedback submission, user authentication, using Spring Framework.
- **Festify** [✉](#): Hackathon and event management multi-module Android app with NodeJs backend and MongoDB database.
- **Hello World** [✉](#): Android application showcasing 0Chain blockchain storage SDK, designed in Kotlin.
- **My Resume** [✉](#): Automated deployment of resume updates using GitHub Actions and GCP to Google Drive.

ACHIEVEMENTS

- Rated Specialist on Codeforces [✉](#) with a max-rating of 1509.
- Practised over 500+ DSA problems on Leetcode [✉](#).
- Google Summer of Code Designing Release Pipelines at Oppia Foundation.
- Member of Oppia Foundation for 2 years.
- Completed Cloud Engineering tracks 30 Days of Google Cloud Program.

EDUCATION

- **Indian Institute of Information Technology, Lucknow** Lucknow
Apr 2020 - Aug 2024
 - Bachelor of Information Technology; CGPA: 8.32
- **Relevant Courses:** Data Structures & Algorithms, Operating System, System Design, DBMS, Object Oriented Programming, Distributed Systems, Software Management, Design Patterns.

TECHNICAL SKILLS

- **Programming & Scripting:** Java, Go, Kotlin, Python, JavaScript, C, C++, SQL, Bash
- **Frameworks & Tools:** SpringBoot, Gin, AndroidSDK, Dagger/Hilt, RxJava, Retrofit, Okhttp, Express, Git, Gradle, Bazel
- **Testing & Databases:** JUnit, Mockito, Robolectric, Espresso, UIAutomator, MySQL, MongoDB, Realm, Postgres, Firebase
- **DevOps, Cloud & Security:** Linux, GCP, Docker, Kubernetes, GitHub Actions, CI/CD, Prometheus, Grafana, Loki, Helm
