

Yash Verma

2+ Years Experience — Backend & Reliability Engineering

yashverma10019.work@gmail.com | +91 8957557113 | [linkedin.com/in/yash10019coder](https://www.linkedin.com/in/yash10019coder) | github.com/yash10019coder

PROFESSIONAL EXPERIENCE

- BrowserStack** Mumbai
 - Software Engineer - Backend, Platform Team** Apr 2025 – July 2026
 - Infrastructure & Reliability**
 - Led the launch of BrowserStack's Australia AWS region (VPC, networking, compute) for GDPR/data-residency, now serving **360K requests/hour** in production.
 - Architected a **CDC pipeline** (35 Debezium connectors) with **Terraform**-provisioned infrastructure, syncing **10TB** MySQL to **ClickHouse** across 4 regions, eliminating manual config drift.
 - Drove **208x query speed up** (9.6s to 46ms) on a 524M-row analytics table via zero-downtime schema migrations across 4 regions.
 - Executed zero-downtime primary-key migrations on 3 production tables of **1B+ rows** (1 TB, 2.9M rows/day) to prevent production outages.
 - Offloaded heavy aggregate queries from MySQL to ClickHouse, cutting database CPU utilization from **96% to 30%** and enabling future capacity growth.
 - Incident Response & Security Hardening**
 - Resolved **2 critical production vulnerabilities** (RCE and SSRF bypass) end-to-end, from triage and root-cause analysis to fix and rollout.
 - Remediated SQL injection across **200+ APIs** and shipped Static (SAST) CI security scanning covering **98% of production traffic**.
 - Enabled TLS for all database connections and led org-wide **RBAC** rollout (roles, hierarchies, 14 check-points) for **50k+ customers**.
 - Zus (formerly Ochain)** Remote
 - Software Engineer - Backend, Blockchain Storage & Mobile (Contract)** Feb 2022 – Mar 2025
 - Automated dynamic Sharder/Miner node management and view-change protocols across a distributed cluster, boosting developer productivity by **90%**.
 - Optimized S3-compatible distributed storage handling **500M+ files** and 40TB+ across **50+ nodes** at sub-100ms latency and **99.9% uptime**.

PROJECTS

- JOB-BORG** Personal Project
 - Multi-User Job-Search Automation Platform** — Django, Celery, PostgreSQL, Redis, Docker
 - Designed a modular **Ingestion → Classification → Matching → Recommendation** pipeline, each stage running as an independent **Celery** task on a Redis-backed queue with Celery Beat scheduling.
 - Built **idempotent hourly ingestion** from the Greenhouse ATS API (keyed on source-ID pairs) so re-runs never duplicate data, plus change-aware classification that only reruns on content diffs.
 - Shipped a **multi-container Docker** deployment (app, worker, beat, Postgres w/ pgvector, Redis) instrumented end-to-end with **Prometheus, Loki, and Grafana** for metrics, log aggregation, and dashboards.
 - Built a **Playwright**-driven auto-apply engine (stacked PR, in review) that fills real Greenhouse forms, constraining **LLM** answers to each field's actual options via a deterministic validation gate rather than trusting model output, and fails closed with typed exceptions on any unresolved field — covered by **290** automated tests.

OPEN SOURCE CONTRIBUTIONS

- Oppia Foundation (GSoC) [Merged PRs]** Mountain View, CA (Remote)
 - OSS Contributor & GSoC** Jun 2021 – Jan 2022
 - Contributed to **Gradle to Bazel** migration and built **CI/CD pipelines** automating build triggers and deployment to **Google Drive, GCP, and Play Store** for 4+ tracks.

TECHNICAL SKILLS

- Cloud & Infra:** AWS, Docker, Kubernetes (K8s), Terraform, Ansible, Helm
- Monitoring & Messaging:** Prometheus, Grafana, Loki, Apache Kafka, Event-Driven Architecture
- Languages:** Go, Python, Java, Bash, SQL, Ruby, Kotlin, C, C++
- Databases:** MySQL, ClickHouse, PostgreSQL, Redis, MongoDB
- DevOps & Tools:** Git, CI/CD, Jenkins, GitHub Actions, SAST, CDC
- Concepts:** Linux Systems Administration, Networking (TCP/IP, Load Balancing), Distributed Systems, Incident Response & Root-Cause Analysis, Zero-Downtime Migrations, Microservices, Query Optimization

ACHIEVEMENTS

- Selected for **Google Summer of Code 2022** (Oppia Foundation).
- Won **top prize** at the **CAMS Hackathon** for developing its Android app.
- Rated **Specialist** on Codeforces (max-rating **1509**) and **5-star** on CodeChef.
- Practised **700+** DSA problems on Leetcode.

EDUCATION

- Indian Institute of Information Technology, Lucknow** Lucknow
 - Bachelor of Information Technology: CGPA: 8.32** Dec 2020 – Apr 2024
