EXPERIENCE

0chain

Cupertino, CA (Remote)

- Software Development Engineer - **Kotlin, Java, Golang, AndroidSDK, GitHub Actions, Gin, Grafana** Feb 2022 – Present
 - Developed two Android apps, **Bolt** and **Vult**, increasing the Android user base by **20%** for decentralized storage using **ZCN crypto**.
 - Spearheaded **UAT test suite** for **enterprise storage** eliminating production bugs by **90%** and improving release quality.
 - Led and two junior developers, improving **code quality** by **40%** and ensuring **95%** on-time delivery through effective **scrum leadership**.
 - Migrated and refactored **GoSdk** to decrease app size by **50%**, also helped cross platform teams with the migration.
 - Integrated **Elastic Search** for processing and **indexing transactions** from blockchain which decreased the fetch time by **10x**.
 - Built the **release pipelines** for **android apps** reducing manual labor and increasing release time by **70%**.

Google Summer of Code Oppia Foundation link

Remote

- GSOC - Kotlin, GitHub Actions, JUnit, UIAutomator, Gradle, Bazel, AndroidSDK** Jun 2021 – Sept 2022
 - Pioneered **CI/CD pipeline enhancements**, reducing **build and deployment time** by **40%**, leading to faster release cycles.
 - Spearheaded **Gradle to Bazel transition**, increasing **build efficiency** by **60%**, accelerating development cycles.
 - Expanded the application's reach by integrating **tablet support**, resulting in a **25%** increase in the potential user base.
 - Orchestrated and refined over **90 automated tests**, increasing **codebase stability** by **30%** and reduced production bugs by **20%**.

Gnome Foundation

Remote

- Open Source Contributor - Tech Stack: C, XML, GTK+** Sept 2021 – Feb 2022
 - Added a new feature in the **path-bar** of **Nautilus file manager**, improving **user efficiency** by **20%** by enabling seamless opening of folders and files.
 - Designed and implemented a new button using **XML**, enhancing **user interaction** by **15%** through improved interface functionality.

BSHAPP

Andhra Pradesh

- Android Freelance Developer** May 2021 – June 2021
 - Added support for **multiple languages**, expanding the app's user base by **30%** and enhancing accessibility in diverse markets.
 - Implemented **Jetpack Navigation** with single activity and multi-fragment architecture, improving app performance by **25%**.
 - Integrated **REST API** with **Retrofit**, reducing data retrieval time by **20%** and improving HTTP request efficiency.

PROJECTS

- Parking Lot Management System**: Developed a RESTful API using **Node.js, Express.js**, and **MongoDB** to manage parking spaces. Integrated **Winston** for logging and conducted unit and integration testing with **Jest**.
- Airline ticketing system**: Built using **Spring Boot** in **MVC architecture** where a user can book tickets, query flights and cancel tickets also **Dockerized**.
- Trip Feedback System**: Designed a feedback system for **Travelers** and **Transport Managers** with secure feedback submission, user authentication, using **Spring Framework**.
- Festify**: Hackathon and event management multi-module Android app with NodeJs backend and MongoDB database.
- Hello World**: Android application showcasing 0Chain blockchain storage SDK, designed in Kotlin.
- Wake-Lock**: Runs a sticky service in the background which adds a partial wake lock to your screen.
- Automated Window Manager**: A CLI tool to automate window management in Linux.
- Backup System Ubuntu**: A bash script to back up apt, snap, and other config files.
- My Resume**: Automated deployment of resume updates using **GitHub Actions** and **GCP** to Google Drive.

ACHIEVEMENTS

- Rated **Specialist** on Codeforces with a **max-rating** of **1509**.
- Practised over **500+** DSA problems on Leetcode.
- Google Summer of Code Designing Release Pipelines at **Oppia Foundation**.
- Member of **Oppia Foundation** for **2 years**.
- Completed **Cloud Engineering tracks** 30 Days of Google Cloud Program.

EDUCATION

Indian Institute of Information Technology, Lucknow

Lucknow

Bachelor of Information Technology; CGPA: 8.32

Apr 2020 - Aug 2024

- Relevant Courses:** Data Structures & Algorithms, Operating System, System Design, DBMS, Object Oriented Programming, Distributed Systems, Software Management, Design Patterns.

TECHNICAL SKILLS

- Programming & Scripting:** Java, Go, Kotlin, Python, JavaScript, C, C++, SQL, Bash
- Frameworks & Tools:** SpringBoot, Gin, AndroidSDK, Dagger/Hilt, RxJava, Retrofit, Okhttp, Express, Git, Gradle, Bazel
- Testing & Databases:** JUnit, Mockito, Robolectric, Espresso, UIAutomator, MySQL, MongoDB, Realm, Postgres, Firebase
- DevOps, Cloud & Security:** Linux, GCP, Docker, Kubernetes, GitHub Actions, CI/CD, Prometheus, Grafana, Loki, Helm
