EDUCATION

- Indian Institute of Information Technology, Lucknow Lucknow
Bachelor of Information Technology; CGPA: 8.32 Apr 2020 - Apr 2024
- Relevant Courses:** Data Structures & Algorithms, Operating System, System Design, DBMS, Object Oriented Programming, Distributed Systems, Software Management, Design Patterns.

EXPERIENCE

- Zus (formerly 0chain)** Cupertino, CA (Remote)
Software Development Engineer - Kotlin, Java, Golang, AndroidSDK, GitHub Actions, Gin, Grafana Feb 2022 – Present
 - Developed two Android apps, **Bolt** (crypto wallet) and **Vult** (decentralized storage platform), increasing the Android user base by **20%** for decentralized storage using **ZCN crypto**.
 - Spearheaded **UAT test suite for enterprise storage** eliminating production bugs by **90%** and improving release quality.
 - Led two junior developers, improving **code quality** by **40%** and ensuring **95%** on-time delivery through effective **scrum leadership**.
 - Migrated and refactored **GoSdk** to decrease app size by **50%**, also helped cross platform teams with the migration.
 - Integrated **Elastic Search** for processing and **indexing transactions** from blockchain which decreased the fetch time by **10x**.
 - Built the **release pipelines for android apps** reducing manual labor and increasing release time by **70%**.
 - Benchmarked **s3 compatible storage** for **500 million** bulk files and **40 TB** large file achieving sub **100ms** latency.
- Google Summer of Code Oppia Foundation** Remote
GSOC - Kotlin, GitHub Actions, JUnit, UIAutomator, Gradle, Bazel, AndroidSDK Jun 2021 – Sept 2022
 - Pioneered **CI/CD pipeline enhancements**, reducing **build and deployment time** by **40%**, leading to faster release cycles.
 - Spearheaded **Gradle to Bazel transition**, increasing **build efficiency** by **60%**, accelerating development cycles.
 - Expanded the application’s reach by integrating **tablet support**, resulting in a **25%** increase in the potential user base.
 - Orchestrated and refined over **90 automated tests**, increasing **codebase stability** by **30%** and reduced production bugs by **20%**.
- Gnome Foundation** Remote
Open Source Contributor - Tech Stack: C, XML, GTK+ Sept 2021 – Feb 2022
 - Added a new feature in the **path-bar of Nautilus file manager**, improving **user efficiency** by **20%** by enabling seamless opening of folders and files.
 - Designed and implemented a new button using **XML**, enhancing **user interaction** by **15%** through improved interface functionality.
- BSHAPP** Andhra Pradesh
Android Freelance Developer May 2021 – Jun 2021
 - Added support for **multiple languages**, expanding the app’s user base by **30%** and enhancing accessibility in diverse markets.
 - Implemented **Jetpack Navigation** with single activity and multi-fragment architecture, improving app performance by **25%**.
 - Integrated **REST API** with **Retrofit**, reducing data retrieval time by **20%** and improving HTTP request efficiency.

PROJECTS

- Trip Feedback System:** Designed a feedback system for **Travelers** and **Transport Managers** with secure feedback submission, user authentication, using **Spring Framework**.
- Festify:** Hackathon and event management multi-module Android app with NodeJs backend and MongoDB database.
- Hello World:** Android application showcasing 0Chain blockchain storage SDK, designed in Kotlin.
- Wake-Lock:** Runs a sticky service in the background which adds a partial wake lock to your screen.
- Automated Window Manager:** A CLI tool to automate window management in Linux.
- Backup System Ubuntu:** A bash script to back up apt, snap, and other config files.
- My Resume:** Automated deployment of resume updates using GitHub Actions and GCP to Google Drive.

ACHIEVEMENTS

- Rated **Expert** on [Codeforces](#) with a **max-rating** of **1509**.
- Practised over **700+** DSA problems on [Leetcode](#).
- Member of **Oppia Foundation** for **2 years**.
- Completed **Cloud Engineering** tracks 30 Days of Google Cloud Program.

TECHNICAL SKILLS

- Programming & Scripting:** Java, Go, Kotlin, Python, JavaScript, SQL, Bash, C/C++
- Backend Frameworks:** Spring Boot, Gin, Express.js, REST/GraphQL APIs, RxJava, Dagger/Hilt
- DevOps & Cloud:** Docker, Kubernetes, GitHub Actions, CI/CD, GCP, Linux, Helm, Prometheus/Grafana/Loki
- Databases & Testing:** MySQL, MongoDB, PostgreSQL, Elasticsearch, Firebase, JUnit, Mockito, UIAutomator
- Tools & Libraries:** Git, Retrofit/OkHttp, Gradle, Bazel, Android SDK (cross-platform support)

SOFT SKILLS

- Communication:** Excellent verbal and written communication skills, effective team collaboration.
- Leadership:** Strong leadership skills, mentoring and guiding junior developers.
- Problem Solving:** Analytical and critical thinking, adept at problem-solving and debugging.
- Adaptability:** Ability to adapt to new technologies and work in a fast-paced environment.
