EDUCATION

- **Indian Institute of Information Technology, Lucknow** Lucknow
Bachelor of Information Technology; CGPA: 8.32 Apr. 2020 – Apr. 2024
- Relevant Courses Data Structures & Algorithms, Operating System, System Design, DBMS, Object Oriented Programming, Distributed Systems, Software Management, Design Patterns.

EXPERIENCE

- **0chain**  Cupertino, CA (Remote)
Full Stack Engineer Feb 2022 – Present
 - Tech Stacks: Kotlin, Java, Golang, AndroidSDK, NDK, GitHub Actions, Elastic Search, Gin, Grafana, Helm.
 - Developed two Android apps, Bolt and Vult, increasing the Android user base by **20%** for decentralized storage using ZCN cryptocurrency.
 - Spearheaded UAT test suite for enterprise blobbers eliminated production bugs by **90%** and improving release quality.
 - Led and mentored two junior developers, improving code quality by **40%** and ensuring **95%** on-time delivery through effective scrum leadership.
 - Migrated and refactored GoSdk to decrease app size by **50%**, also helped cross platform teams with the migration.
 - Integrated Elastic Search for processing and indexing transactions from blockchain which decreased the fetch time by **10x**.
 - Incorporated release pipelines for android apps reducing manual labour and increasing release time by **70%**.
- **Google Summer of Code Oppia Foundation** link  Remote
Open Source Contributor - Gsoc Student June 2021 – Sept 2022
 - Tech Stack: Kotlin, GitHub Actions, JUnit, UIAutomator, Gradle, Bazel, AndroidSDK.
 - Pioneered CI/CD pipeline enhancements, reducing build and deployment time by **40%**, leading to faster release cycles.
 - Spearheaded Gradle to Bazel transition, increasing build efficiency by **60%**, accelerating development cycles.
 - Expanded the application's reach by integrating tablet support, resulting in a **25%** increase in the potential user base.
 - Orchestrated and refined over **90 automated tests**, increasing codebase stability by **30%** and reduced production bugs by **20%**.
- **Gnome Foundation**  Remote
Open Source Contributor Sept 2021 – Feb 2022
 - Tech Stack C, XML, GTK+
 - Added a new feature in the path-bar of Nautilus file manager, improving user efficiency by **20%** by enabling seamless opening of folders and files.
 - Designed and implemented a new button using XML, enhancing user interaction by **15%** through improved interface functionality.

PROJECTS

- **Parking Lot Management System** : Developed a RESTful API using Node.js, Express.js, and MongoDB to efficiently manage parking spaces. Integrated Winston for logging and conducted unit and integration testing with Jest.
- **Airline ticketing system:**  Built using Spring Boot in MVC architecture where a user can book tickets, query flights and cancel tickets also Dockerized it.
- **Hello World** : Android application showcasing 0Chain blockchain storage SDK, designed in Kotlin.

ACHIEVEMENTS

- Rated **Specialist** on Codeforces  with a **max-rating** of **1509**.
- Practised over **500+** DSA problems on Leetcode .
- Google Summer of Code Designing Release Pipelines at **Oppia Foundation**.
- Member of **Oppia Foundation** for **2 years**.
- Completed **Cloud Engineering** tracks 30 Days of Google Cloud Program.

TECHNICAL SKILLS

- **Programming & Scripting:** Java, Go, Kotlin, Python, JavaScript, C, C++, SQL, Bash
- **Frameworks & Tools:** SpringBoot, Gin, AndroidSDK, Dagger/Hilt, RxJava, Retrofit, Okhttp, Express, Git, Gradle, Bazel
- **Testing & Databases:** JUnit, Mockito, Robolectric, Espresso, UIAutomator, MySQL, MongoDB, Realm, Postgres, Firebase
- **DevOps, Cloud & Security:** Linux, GCP, Docker, Kubernetes, GitHub Actions, CI/CD, Prometheus, Grafana, Loki, Helm
