EDUCATION

- **Indian Institute of Information Technology, Lucknow** **Uttar Pradesh, India**
Bachelor of Technology in Information Technology; CGPA: 8.58/10.00 *Dec 2020 - June 2024*

EXPERIENCE

- **Saison Omni** Bengaluru, Karnataka
SDE-1 Java, SpringBoot, PgSQL *Oct 2024 - Present*
 - Working on Backend systems to build and maintain a Co-Lending platform between Banks and NBFC.
 - Working on Rule Engine for Validating Policy Rules using Drolls and Java.
- **MFine** Bengaluru, Karnataka (Remote)
SDE Intern JavaScript, NodeJs, Express, MongoDB, Postman, Studio 3T, Jira, Bitbucket *April 2024 - Oct 2024*
 - Engaged in design, development, integration, and bug resolution using SOLID principles, improving overall code quality and maintainability within **Microservices** architecture for multiple backend services in Product & Technology team
 - Integrated new features into the API responses to improve system functionality and user experience.
 - Performed thorough testing and debugging to ensure API changes adhered to expected behavior and security standards.
- **Belzabar Software** Delhi (Remote)
Developer Intern JavaScript, PostgreSQL, Postman, Expertly *Mar 2024 - May 2024*
 - Developed APIs for **North Carolina Department of Transportation** portal using backend automation tool **Expertly**
 - **Designed and optimized SQL databases**, crafted complex queries to efficiently filter, sort, alter, and retrieve data while ensuring data integrity and optimizing performance through **strategic indexing** and **query optimization techniques**
 - **Migrated APIs** between different development environments using **Postman**, ensuring smooth transitions, compatibility, and maintainability across various stages of the **software development lifecycle**
- **KPSM SOLUTION PVT LTD** Mohali, Punjab (Remote)
Android Developer Java, Kotlin, XML, Android Studio, MVVM *Feb 2023 - June 2023*
 - **Developed and optimized** Android applications using **Kotlin, MVVM Clean Architecture**, following industry best practices to ensure code maintainability, scalability, and performance
 - **Utilized Coroutines with Retrofit Library** for **asynchronous and efficient API integration**, reducing latency, enhancing application responsiveness, and improving user experience
 - **Implemented Paging 3 library** to enable efficient **data fetching and caching**, resulting in a seamless user experience, improved memory management, and reduced network usage through **incremental data loading** and **offline accessibility**
 - Developed and implemented new user interface components and features for the app, while actively participating in code reviews to ensure high code quality and maintainability
- **Oppia-Foundation** Mountain View, CA (Remote)
Open-source Collaborator Kotlin, Bazel, Junit, Android Studio, MVVM *Aug 2021 - Mar 2022*
 - Implemented over **30 Unit** and **UI** tests using **Espresso** and **Robolectric**, boosting code coverage for Binding Adapters
 - Accelerated build processes by **10x** through leading the migration from **Gradle** to **Bazel** for the Android build system.
 - Merged **12+** pull requests and proactively opened key issues, resolved critical bugs, boosting project quality and reliability
 - Partnered with the **UI/UX** team to design adaptive interfaces, improving support across diverse screen sizes and devices

PROJECTS

- **FavDish** Kotlin, RoomDB(SQL), Android Jetpack, Navigation component, Retrofit, RxJava :
 - Create, save favorites, and discover new recipes on mobile using MVVM Architecture
- **Festify** Kotlin, RoomDB(SQL), Navigation component, Retrofit, RxJava, Work manager, NodeJs, React, MongoDB:
 - Hackathon and event management Android app with Node.js backend and MongoDB database. New events are listed on the app. Users can register for events and participate
- **Airline Ticketing System** Java, SpringBoot, MongoDB, Docker, Maven:
 - The Airline Ticketing System is a Spring Boot application designed to handle flight bookings, cancellations, and flight management. It supports features such as flight search, booking, cancellation, and flight information retrieval. The application uses MongoDB as the database and provides RESTful APIs for interacting with the system with Swagger UI and Documentation

ACHIEVEMENTS

- Rated **Specialist** on **Codeforces** with a **max-rating** of **1532**
- Practised over 500+ DSA problems on **Leetcode**
- Been an open-source contributor at **Oppia-Foundation** for about **9** months
- **CAMS Hackathon**: Won top prize of 16K INR at the CAMS Hackathon for the development of its Android app

PROGRAMMING SKILLS

- **Languages:** C/C++, Java, Kotlin, Python, JavaScript/TypeScript, SQL, XML, HTML, CSS
- **Technologies:** Node.js, Spring Boot, Express, MongoDB, React, MySQL, Firebase, Gradle, Bazel, JSON, TailwindCSS
- **Developer Tools:** Linux, Git/GitHub, Visual Studio Code, Android Studio, npm, Postman, Canva
- **Academic Coursework:** DSA, Operating System, DBMS, OOPs, Software Management
